## DETAILED ACTION

### *Election/Restrictions*

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

**Specie I**, claims 1-7, drawn to a cooling structure with a plurality of heat spreaders, representative Fig. 8;

**Specie II**, claims 8-14, drawn to a cooling structure comprising a cap, representative Fig. 9;

**Specie III**, claims 15-21, drawn to a cooling structure comprising a heat spreader connected to the integrated circuit chip that produces the most thermal energy, representative Fig. 11.

**Specie IV**, claims 22-26, drawn to a cooling structure comprising a heat dissipating structure connected to the upper sides of the integrated circuit chips through the gaps filled with a thermally conductive material, wherein said heat dissipating structure is shaped such that the smallest of said gaps exists between the top of the integrated circuit chip that produces the most thermal energy and the bottom of said heat dissipating structure, representative Fig. 3 or 7.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is

Art Unit: 2835

finally held to be allowable. Currently, there are no generic claims in the instant application.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2835

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
